Your Essential Connection
American Industrial
Hygiene Association
(AIHA)

Volume 2

The papers in this book comprise the proceedings of **Healthy Buildings 2003**. They reflect the authors' opinions and are published as presented without change, in the interests of timely dissemination. Their inclusion in this publication does not necessarily constitute endorsement by the editors, the sponsors or the organisers.

Foreword

The Healthy Buildings conference is, for the first time, convened outside its traditional European-American circuit, and signifies the international recognition that healthy buildings and indoor environments are as much needed and desired in the developed and developing worlds, across all climatic regions. In the aftermath of the first emergence of Severe Acute Respiratory Syndrome (SARS), issues of environmental quality and control have become much more pertinent and important. In an unprecedented way, the linkage between health and environmental quality on the “consumer end” of the chain, and the policies, management and technologies on the “supply end” has been highlighted and articulated beyond the usual platforms of scientific publications to popular media. This presents HB2003, the 7th International Conference in tropical Singapore, as a unique opportunity for scientists, practitioners and policy makers to convene, discuss and share their latest findings and thinking on healthy buildings.

HB2003 continues the excellent work achieved by its predecessors in recognizing emergent issues and focusing on developing practical solutions based on rigorous scientific explorations and information. In recognising the importance, relevance and challenges of both IAQ and energy globally over the past four decades, the thrust of HB2003 is towards Energy-Efficient Healthy Buildings. Keynote addresses provide the state-of-the-art reviews and insights along the following five conference themes:

- Theme 1 : Science of Indoor Air Quality (IAQ) parameters
- Theme 2 : Materials, systems and technologies for healthy buildings
- Theme 3 : IAQ and human response
- Theme 4 : Practice and implementation issues in creating healthy buildings
- Theme 5 : Issues of healthy buildings and energy efficiency in the developing countries

Almost 400 papers from 45 countries documenting the research, thinking, innovative solutions and technologies for the achievement and sustenance of energy-efficient healthy buildings are published in three volumes of proceedings that are organised according to the five themes of the conference. Whilst 40% of the papers presented at HB2003 relate to the study of fundamental issues of indoor contaminants including thermal comfort aspects in THEME 1, 27% of the papers provide an insight into practical solutions across different climatic conditions in THEME 2. Environmental health related studies that impact upon occupant perception and work performance constitute 17% of the papers and are presented in THEME 3. Considerations from practitioners’ viewpoint are addressed in another 14% of the papers in THEME 4. The perspectives of the developing world are presented in a small number of papers in THEME 5.

All the technical papers published in HB2003 proceedings are presented as either ORAL or POSTER mode. To facilitate maximum interaction among authors and delegates, about half the total number of papers is presented as POSTERS, which are displayed throughout the duration of the conference. The poster papers are briefly introduced following oral presentations in a particular theme in each of the 55 parallel sessions that are spread across four days of the conference. Additionally, the technical sessions also incorporate six ISIAQ Task Force Workshops and a special SARS workshop.

A summary of the deliberations at the various Technical Sessions will be consolidated and made available to all delegates (by email) as a Post-Conference document and will also be uploaded on the conference website: www.hb2003.org

Acknowledgements	vii
Brief Contents for Volume 1 and Volume 3	viii
 (1C) THERMAL COMFORT	
Thermal Comfort in Office Buildings With Underfloor Air Supply—Quantitative and Qualitative Analysis	1
<i>B. C. C. Leite, A. Tribess</i>	
The Impact of the Warmth Thermal Sensation into Non-Air-Conditioned and Naturally Ventilated Office Environments of Tertiary Refurbished Buildings in Tropical Climate	7
<i>T. C. F. Queiroz Gaudin, L. E. G. Bastos</i>	
Evaluation on Thermal Comfort of Electric Heating Films System in Residential Building	13
<i>X. J. Ma, X. W. Xu, S. Wan, K. J. He</i>	
Numerical Calculation of Angle Factor and Effective Radiation Area for Humans and Animals Using Hemi-Cube Method	19
<i>S. Watanabe, S. Tanabe</i>	
Thermal Comfort Requirements from Hot-Humid to Hot-Dry Regions	25
<i>S. A. R. Saeed</i>	
The Adaptive Approach to Thermal Comfort: From Models to Solutions	30
<i>I. Fato, C. Chiancarella</i>	
The Effects of Direct and Indirect Air Flow on Thermal Comfort	36
<i>J. Y. Lee, S. W. Chin, B. Y. Chung</i>	
A Thermal Comfort Study on Displacement Ventilation in the Tropics	42
<i>W. J. Yu, K. W. Cheong, R. Kosonen, Y. H. Xie, H. C. Leow</i>	
Thermal and Airflow Behaviour of Buildings—Model Reduction	48
<i>T. Berthomieu, H. Boyer</i>	
An Experimental Study on the Comfort Zone in a Radiant Floor Heating System	54
<i>K. S. Chung, Y. K. Baik, M. K. Cho, D. W. Yoon, H. W. Lee</i>	
Thermal Comfort in an Evaporatively Cooled Building: Effect of Exterior Wall Orientation and Exposure	61
<i>D. A. Hindoliya, S. C. Mullick</i>	

An Adaptive Thermal Comfort Approach in Air-Conditioned Buildings in the Tropical Hot-and-Humid Climates	67
<i>F. Tan, R. Kosonen</i>	
Modelling of Thermal Comfort in Spaces With Radiant Heating	73
<i>K. Kabele, Z. Veverková</i>	
Periodic Heat Transfer Analysis—An Analytical Tool in Modelling of Non Air Conditioned Multi-Zone Buildings	79
<i>V. Majali, B. N. Prasad, A. K. Bhat</i>	
Thermal Characteristics of a Partition Air Supply System at Personal Task Area	86
<i>K. Jeong</i>	
Subjective Response to the Thermal Comfort in Heated Dwellings	92
<i>D. Petras, J. Sabikova</i>	

(1D) PARTICULATE MATTER

Ultrafine and Fine Particles, VOC and Odour Emissions From Dusty Air Filters	98
<i>M. Hyttinen, P. Yli-Pirilä, M. Björkroth, P. Pasanen, T. Raunemaa, P. Kalliokoski</i>	
Indoor Air Quality in 2 Different Office Buildings—Part 2 : Indoor and Outdoor Airborne Particulate Levels and Air Filtration	104
<i>A. Ginestet, B. Ribot, M. Henninot, D. Pugnet</i>	
IAQ Assessment in a Large School of Arts—Worker Exposure to Fine Particulate Matter and VOCs	111
<i>P. Yli-Pirilä, J. Nuutinen, T. Raunemaa</i>	
An Eulerian Model for Particle Deposition Under Electrostatic and Turbulence Condition ..	117
<i>F. Z. Chen, S. C. M. Yu, A. C. K. Lai</i>	
A Pilot Study on the Effect of Indoor Particle Sources on Indoor Particle Concentration in Residential Houses	123
<i>C. He, L. Morawska, J. Hitchins, D. Gilbert</i>	
Particle Collection Efficiency of Sorbent Tubes	129
<i>M. Jamriska, E. Uhde</i>	
Ultrafine and Fine Particle Formation in a Naturally Ventilated Office as a Result of Reactions Between Ozone and Scented Products	134
<i>J. Toftum, F. van Dijken</i>	
Characterization of Particulate Matter in the Tropics	140
<i>A. Gupta, K. W. Cheong, N. H. Wong</i>	
Particulate Matters in School Environments: Assessing the Effectiveness of a Low Allergen School	147
<i>G. C. Zhang, K. Rumchev, A. H. Lee, J. Spickett</i>	
A Review of Modeling Particle Deposition	153
<i>F. Z. Chen, A. C. K. Lai</i>	
When to Open Windows—A Concept of Balance-point Outdoor Concentration of Particles	159
<i>Y. G. Li, Z. D. Chen</i>	
Monitoring Pollutants in Occupied Spaces	165
<i>J. I. Currie, G. Capper</i>	
Indoor Air Pollution and Respiratory Health of the Peoples in Beijing: A Community-Based Polit Study	170
<i>X. C. Pan, L. G. Wang, L. H. Wang, X. B. Jin</i>	
A Preliminary Study of Respirable Suspended Particulate Level in Taxi Transport Interchanges in Hong Kong	176
<i>W. Z. Lu, X. K. Wang</i>	

Transport of Fungal Spores and Particles Through a Building Structure	182
<i>M. Airaksinen, P. Pasanen, J. Kurnitski, O. Seppänen</i>	
Impact of Ventilation Strategies on Particle Deposition in a Test Chamber	188
<i>J. Bouilly, M. Abadie, K. Limam, F. Allard</i>	
Indoor and Outdoor Measurements of Ultra Fine Particles In A Medium-Size and Large City	194
<i>U. Matson, L. E. Ekberg</i>	
VOC and Fine Particles in a Newly Renovated Building—A Case Study	200
<i>E. Uhde, G. A. Ayoko, L. Morawska</i>	
Modelling of Indoor Concentrations of Ultra Fine Particles Based on Laboratory Measurements	205
<i>A. Afshari, L. Ekberg, U. Matson</i>	
Relationship Between Indoor/Outdoor Concentrations of Particles: A Critical Review	212
<i>L. Morawska, C. He</i>	
Estimated Fine Particulate Matter Exposure Reduction Potential for Urban Population Using State of the Art Building Envelopes and Ventilation Systems: Example, Helsinki Finland	219
<i>O. O. Hänninen, M. J. Jantunen</i>	

(2A) CLIMATE SPECIFIC DESIGN

A Parametric Study of Traditional Housing Prototypes From the Middle East	225
<i>I. A. Meir, I. Gilead, T. Runsheng, J. M. Bennett, S. C. Roaf</i>	
Environmentally Responsive Building Design	231
<i>C. McCabe</i>	
Architecture : In Quest for a Sustainable Future	237
<i>A. Krishan</i>	
Energy Optimization Through Thermal Zoning—The Outer Skin	243
<i>P. Mendonça, L. Bragança</i>	
Climatic Maps for Natural Energy and Passive Cooling Methods Utilization in Thailand	249
<i>A. Jittawikul, I. Saito, O. Ishihara</i>	
Influence of the Degradation of Building Components on Thermal Comfort	256
<i>F. Re. Cecconi, P. Iacono</i>	
Moisture Control in Cold Climates—The Report of ISIAQ Task Force IX	262
<i>U. Haverinen, T. Follin, A. Nevalainen</i>	

(2B) BUILDING TYPES

A Questionnaire Survey of Special Old Age Nursing Homes and Elderly Health Care Facilities in Japan	266
<i>S. Yokoyama, M. Yoshioka, S. Koguchi, K. Hataya, K. Ikeda, Y. Hamada, M. Nakamura, H. Kubota</i>	
Statistical Analysis of Parameters Influencing the Relationship between Outdoor and Indoor Air Quality	272
<i>O. Poupard, P. Blondeau, V. Iordache, F. Allard</i>	
The Indoor Climate in Historic Buildings Without Mechanical Ventilation Systems	278
<i>M. Ryhl-Svendsen, T. Padfield, V. A. Smith, F. D. Santis</i>	
Human Exposure to Particulate and Gaseous Pollutants in a Bar	284
<i>J. I. Currie, G. Capper</i>	
Air Quality in Polish Schools—Pupils' Self Estimation	290
<i>J. Sowa, B. Ignar-Golinowska</i>	

(2C) VENTILATION

The Variation of Ventilation Performance in Relation to Change in Workstation Location in a Ventilated Room	296
<i>Y. Cho, H. B. Awbi, M. Marchetti</i>	
Post-Occupancy Monitoring of Windcatchers for Summer Ventilation in the UK	302
<i>A. A. Elmualim, H. B. Awbi</i>	
The Ups and Downs of Air Flow in Building Ventilation	308
<i>Y. G. Li</i>	
Influence of the Jet Initial Inclination Angle on the Performace of an Air Curtain Device	314
<i>L. P. C. Neto, M. C. G. Silva</i>	
The Verifying Concept for the Cleanliness of HVAC Systems	321
<i>V. Asikainen, R. Holopainen, A. Majanen, O. Seppänen, A. Seppälä, T. Jalonen, P. Pasanen</i>	
A Statistical Approach to the Evaluation of the Maximum Velocity Within the Occupied Zone	327
<i>K. Hagström</i>	
Air Change Rates in Multi-Family Residential Buildings in Northern Portugal	333
<i>M. Pinto, C. A. Boman, H. Stymne, V. P. D. Freitas</i>	
Influence of Geometry of Thermal Manikins on Room Airflow	339
<i>C. Topp, P. Hesselholt, M. R. Trier, P. V. Nielsen</i>	
The Impact of a Personalized Ventilation System on Indoor Air Quality at Different Levels of Room Air Temperature	345
<i>J. R. Yang, J. Kaczmarczyk, A. K. Melikov, P. O. Fanger</i>	
Ventilation and IAQ Performance of a Typical Split-System Air-Conditioning Unit in a Residential Apartment in Singapore	351
<i>S. C. Sekhar, W. K. Lim</i>	
Influence of Geometry of Thermal Manikins on Concentration Distribution and Personal Exposure	357
<i>C. Topp, P. Hesselholt, M. R. Trier, P. V. Nielsen</i>	
Deflection Ventilation—A Conceptual Introduction	363
<i>Z. Lin, T. T. Chow, Y. Li</i>	
Experimental and Numerical VOC Concentration Field Analysis From Flooring Material in a Ventilated Room	370
<i>A. A. Akoua, B. Collignan, F. Maupetit, O. Ramalho</i>	
The Capability of a Needle Heat Exchanger to Prevent Moisture and Microbial Damage of the Fine Filter	376
<i>R. Halonen, H. Kokotti, L. Kujanpää, T. Kesikuru, M. Reiman</i>	
Indoor Air Quality and Airflow Distribution as a New Factor in Surgical Operating Theatres : A new Hypothesis	382
<i>R. Kameel, E. E. Khalil</i>	
Use of a Sensory Irritation Potential Index to Characterize Improvement of Indoor Air Quality in French Schools by Ventilation	388
<i>C. Mandin, R. Meininghaus, A. Cicolella</i>	
A Study of Demand-Controlled Ventilation (DCV) and Constant Air Volume Systems (CAV)	392
<i>M. Soleimani-Mohseni</i>	
Tracer Gas Measurement of Airflow Rates in Rooms With Several Air-Handling Units	398
<i>C. A. Roulet, M. S. Zuraimi, S. C. Sekhar, K. W. Tham</i>	
Relative Influence of Boundary Conditions on the Indoor Air Quality of a Displacement Ventilated Room	404
<i>H. Brohus</i>	

Distribution of Room Air Contaminant Concentrations as a Function of Ventilation and Air Cooling—A Numerical Investigation	410
<i>A. Damian, P. Blondeau, F. Allard</i>	
The Influence on Ventilation Efficiency in Typical Dwelling With Floor-Based Displacement Ventilation	416
<i>N. T. Chen, Y. Y. Li, P. C. Chou, C. M. Chiang</i>	
Presumption Experiment of Supply Rate Fulfillment Using Tracer Gas—Verification on the Cylinder House.	422
<i>M. Tajima, T. Sawachi, H. Seto, H. Takeda</i>	
Effect of Ventilation on Mold Growth in a Japanese Bathroom	428
<i>Y. Aizawa, K. Abe</i>	
Application of Active Stack System to Enhance Natural Ventilation in High-rise Residential Buildings	434
<i>R. Priyadarsini, K. W. Cheong, N. H. Wong</i>	
A Breath of Fresh Air (Natural Ventilation Strategies for Indoor Air Quality)	440
<i>S. Fishman</i>	
The Impact of an Uniformly Distributed Thermal Load on Mixed Flow	444
<i>I. Gores</i>	
Personalized Ventilation: Experimental Apparatus to Evaluate High Induction Air Terminal Devices	452
<i>P. Gori, L. Grossi, A. Vallati</i>	
Mixing and Displacement Ventilation Compared in Classrooms; Distribution of Particles, Cat Allergen and CO₂	458
<i>M. Mattsson, G. Smedje, L. Holmquist, O. Vesterberg, R. Wålander</i>	
Experimental Study on Unsteady Air Terminal	465
<i>S. F. Sun, R. Y. Ding, R. Y. Zhao, W. Q. Xu</i>	
Effects of Naturally Ventilated Double Skin Walls on Indoor Thermal Environment	471
<i>J. G. Tsutsumi, M. Shingaki, R. Arakawa, R. Nakamatsu</i>	
Passive Parallel VOCS and Ventilation Rate Sampler	475
<i>Y. Okuizumi, K. Kumagai, M. Fujii, H. Yoshino, N. Shinohara, A. Mizukoshi, Y. Yanagisawa</i>	
Permeation of Tracer Gases Through Building Materials—Consequences for Ventilation Measurements with Tracer Gas Techniques	480
<i>P. Hansson, H. Stymne, A. Valfridsson</i>	
Performance of Personalised Ventilation in a Room With an Underfloor Air Distribution System: Transport of Contaminants Between Occupants	486
<i>R. Cermak, A. K. Melikov</i>	
Design Methods for Air Distribution Systems and Comparison between Mixing Ventilation and Displacement Ventilation	492
<i>P. V. Nielsen, T. S. Larsen, C. Topp</i>	
Air Quality of Kitchens in Jaipur City due to the Use of LPG as a Cooking Fuel: Part I—Role of Exhaust Fan in Dissipating the Pollution Generated	498
<i>T. P. Gupta, A. B. Gupta, R. Jain, V. Singh</i>	
Methods and Methodological Tools for the Elaboration of Natural Ventilation Strategy	504
<i>Y. Mansouri, F. Allard</i>	
The Retrofit of Respiratory Isolation Rooms for Tuberculosis Patients in Taiwan	510
<i>H. T. Loong, M. J. Wang, C. L. Chen, R. J. Shyu</i>	
Potential Economical Benefits of Balancing Air Flows in an Office Building	516
<i>M. Tuomainen, J. Smolander, P. A. Korhonen, L. Eskola, O. Seppänen</i>	
Indoor Air Quality on Displacement Ventilation in the Tropics—A Chamber Study	522
<i>Y. H. Xie, K. W. Cheong, R. Kosonen, W. J. Yu, H. C. Leow</i>	

Improvements of ADPI and Ventilation Effectiveness of a Classroom by a Dedicated Outdoor Air System	528
<i>H. Han, Y. I. Kwon, K. H. Kim, G. S. Lee, H. S. Choi, G. G. Lee</i>	
Applying Tracer Gas Technique For Measurements in Air Handling Units With Large Recirculation Ratio	535
<i>C. A. Roulet, M. S. Zuraimi</i>	
The Use of CFD Simulations for the Assessment and Improvement of a Natural-Ventilated Hospital Building	541
<i>A. Lee, H. J. Poh, G. X. G. Xu, K. Kumar, A. Meier</i>	
Development of an Extraction Equipment for Preventing the Transmission of Contaminant Exhaled Air	548
<i>H. K. W. Mui, D. W. T. Chan, L. K. C. Law</i>	
CFD Simulation of Airflow Characteristics of Swirling Floor Diffusers	556
<i>H. T. Xu, J. L. Niu</i>	
 (2D) CONTROL STRATEGIES	
A Study of Static and Dynamic Feed Forward in Temperature Control of Buildings	562
<i>M. Soleimani-Mohseni, B. Thomas</i>	
Survey of Indoor Air Quality in Three Swimming Pools	568
<i>P. Yli-Pirilä, T. Jauhiainen, L. Kujanpää, A. Hirvonen, R. Halonen, M. Reiman, H. Kokotti, T. Raunemaa</i>	
Comparison of Occupancy Detection Algorithms, Methods of Signals Filtration and Types of Requirements Expression for CO₂-based DCV Systems	574
<i>J. Sowa</i>	
Evaluation of Gas-Phase Air Cleaning Devices—Full-Scale Chamber Test Methods and Results	580
<i>W. H. Chen, J. S. Zhang, J. Smith, Z. B. Zhang</i>	
Capture Efficiency of Combustion Gases From Gas Fired Cooking-Stoves—Implications For Exposure to Nitrogen Dioxide in Homes	586
<i>H. Stymne</i>	
Impact of Airflow Interaction on Inhaled Air Quality and Transport of Contaminants in Rooms With Personalized and Total Volume Ventilation	592
<i>A. K. Melikov, R. Cermak, O. Kovar, L. Forejt</i>	
Fuzzy Controllers for HVAC-VAV Systems to Maintain IAQ	598
<i>A. G. S. Sweet, D. Mohan Lal, Sharmeela</i>	
Fuzzy Logic Based Controller for Elevator System in Buildings	604
<i>M. Mantravadi, V. Garg</i>	
A Personal Air Purifier for Schoolchildren	610
<i>K. Kumagai, K. Ito, K. Takahara, M. Hashida, H. P. Tang, Y. Yanagisawa</i>	
Natural Products as Antifungal Agents in Carpets	616
<i>C. Inumaru, N. Zimmerman, C. Woloshuk, J. McGlothlin, H. Cember</i>	
A Study on Effective Ventilation Strategy to Remove Pollutant in an Isolation Room of a Hospital	621
<i>K. W. Cheong, S. Y. Phua</i>	
Energy Efficient Duct Design and Control of VAV Systems: Where is the Fan Energy Savings?	628
<i>I. Khoo, M. Cook</i>	

(2E) ENERGY EFFICIENCY

Can We Achieve Energy Efficiency and Good IAQ in Buildings?	634
<i>L. Jayamaha</i>	
Potential IAQ and Energy Benefits Achievable with Personalized Air Supply	640
<i>J. L. Niu</i>	
An Introduction of Independent Humidity Control System Using Liquid Desiccant Air Conditioner	646
<i>Z. Li, Y. Jiang, X. Y. Chen, X. H. Liu</i>	
Heat and Mass Transfer Analysis of Cross-Flow Heat Exchanger for Energy Recovery from Exhaust Air	653
<i>S. Anisimov, J. Zuchowicki</i>	
Architectural and Economical Implications in Consumption of Electricity on the Housing Sector in Arid Zones: The Mexicali Case in Mexico	659
<i>R. A. Romero, J. D. Morales</i>	
Energy Analysis of the Thermal Comfort	665
<i>M. Prek, V. Butala</i>	
Energy Efficient Air-Conditioning and Air Distribution System for Improved Indoor Air Quality	671
<i>S. C. Sekhar, C. R. U. Maheswaran, K. W. Tham, K. W. Cheong</i>	
Evaluation of Potential Possibility of Energy Efficiency in Residential Buildings	675
<i>B. Petrov, I. Puikēvica-Puikēvska, N. Zeltinsh</i>	
Measures to Conserve Cooling and Heating Load Using a Pulse Ventilation System and Adsorbent Materials	681
<i>M. Fujii, K. Kumagai, N. Shinohara, J. Kawahara, Y. Okuizumi, Y. Katsuyama, Y. Yanagisawa</i>	
Energy Efficiency Potential of Personalized Ventilation System in the Tropics	686
<i>S. C. Sekhar, N. Gong, C. R. U. Maheswaran, K. W. Cheong, K. W. Tham, A. K. Melikov, P. O. Fanger</i>	
A Design Oriented Indexing System for Energy Use and Indoor Climate	692
<i>E. Bjørn, H. Brohus</i>	
Energy Conservation for Operation Theaters by Secondary Return Air System	698
<i>S. C. Hu, Y. C. Chuang, F. W. Hsiao</i>	

(2F) INNOVATIVE TECHNOLOGIES & SOLUTIONS

Visual Comfort of New Window Systems for Office Buildings	703
<i>E. Mochizuki, T. Iwata, D. Itoh, N. Oba, M. Hirayama</i>	
Effect of Glass Transition Temperature on Volatile Emissions From Vinyl Flooring	709
<i>J. C. Little, S. S. Cox, A. T. Hodgson</i>	
Self-Regenerating Liquid Desiccant—Vapor Compression Hybrid Air Conditioning System	713
<i>P. R. Prasad, B. S. Mohan, M. P. Maiya</i>	
Comparison of Two IAQ Calculation Methods	719
<i>W. B. M. Stanley, C. O. Muller</i>	
Task AC Unit Operating Rate Prediction in Office	725
<i>T. Nobe, S. Tanabe, Y. Tomioka</i>	
Penetration of Degradation Products From Adhesive Into Concrete	731
<i>A. Sjöberg</i>	
Efficient Dynamic Thermal Modelling Using CFD	737
<i>S. Somarathne, M. Seymour, M. Kolokotroni</i>	
Optimisation of the Indoor Thermal Comfort in Private House Using Advanced Turbulent Models	743
<i>P. Tibaut, L. Škerget</i>	

Definition of an Environmental Performance Evaluation System	750
<i>E. Cangelli, I. Plantamura</i>	
Healthy Bathroom—Bathrooms of the Future-	757
<i>G. Fujii</i>	
Development of Passive Flux Sampler (PFS) for Measurement of Formaldehyde Emission Rates	763
<i>N. Shinohara, M. Fujii, A. Yamasaki, K. Kumagai, S. Gishi, Y. Yanagisawa</i>	
A Novel Technique For Measuring Moisture in Constructions and Application Examples	770
<i>J. Voutilainen, J. Partanen, T. Reiniaho, E. Tommila, R. Sepponen</i>	
The Influence of the Capture Jet on the Efficiency of the Ventilated Ceiling in Commercial Kitchen	776
<i>R. Kosonen, P. Mustakallio</i>	
Overall Assessment Tool for Sustainable Office Building Design—Towards Consistent Information and Knowledge Structure Needed For Innovative Design	782
<i>A. Abusada</i>	
Development of an Advanced Supply Air Filter	788
<i>I. Kulmala, A. Taipale, K. Heinonen, T. Jalonen, V. Mäkipää</i>	
The Effect of Water Floor on the Indoor Climate Control in Passive Solar House	794
<i>Y. Hori, N. Sunaga, Z. J. Xian</i>	
Exploration of CFD Models for Personalized Ventilation Air Terminal Devices	800
<i>N. Gong, S. C. Sekhar, K. W. Cheong, K. W. Tham</i>	
High Speed Monitoring of Ethylene Oxide at the Sterilization Unit	806
<i>J. Rieder, I. Schuellner, H. Raifer, F. Bodrogi</i>	
Implementation of Triple Layer Façade in Singapore	810
<i>H. Schepers, R. Cole, N. Johnson</i>	
Development of Contamination Testing Protocol for Ventilation System Components	814
<i>R. Alén</i>	
European Testing Programme Investigating the Operation of an Innovative Ventilation System for Houses in Temperate Climates	820
<i>M. McEvoy, R. Southall</i>	
Preliminary Findings of a Pilot Study of Personalized Ventilation in a Hot and Humid Climate	825
<i>S. C. Sekhar, N. Gong, C. R. U. Maheswaran, K. W. Cheong, K. W. Tham, A. K. Melikov, P. O. Fanger</i>	
Considerations in the Formulation of a Mathematical Model for a Newly Developed Compartmented Cooling Coil	831
<i>C. R. U. Maheswaran, S. C. Sekhar, K. W. Tham</i>	
Performance Evaluation of an Air Cleaner Using Sorption Effect and its Life Cycle Inventory Analysis	837
<i>H. Matsumoto, G. Okamura</i>	
A Pilot Study on Use of Hot Water in a Bathtub as a Heat Resource for Floor Heating	844
<i>N. Kakitsuba, T. Mizoguchi, S. Amagai</i>	
New Air Terminal Devices with High Efficiency for Personalized Ventilation Application	850
<i>Z. Bolashikov, L. Nikolaev, A. K. Melikov, J. Kaczmarczyk, P. O. Fanger</i>	
New Method to Measure Stored VOC in Concrete	856
<i>A. Sjöberg, C. Engström</i>
