

vendor/seller guide for the outlaw market

how to add new items

- first make sure you have read the basic market rules and the rules for item listing
- choose CREATE OFFERS from the main menu (01)

- select first the END-category fitting to your item to list (02a) here you can choose the MAIN-category of the item to list (DRUGS, DIGITAL GOODS or SERVICES) I have selected drugs and
- now you select in field (02b) the fitting UNDER-category of your item (for our example I will take DRUGS-ALL CANNABIS-SEEDS)
- press the APPLY button (03)

- if you have already other listings in the chosen category they will appear here (04) and
- the CREATE NEW PRODUCT button appears (05)
- after double-checking the category you can go on by pressing
- a new window will pop up looking like this....

Important Information:
 This website is different to the usual open source marketplaces!

1. The amounts **must not** be in the same field as the title! Please write them into the appropriate form-fields
2. Please do not write any delivery information into the product-text! Destinations and delivery costs must be defined in the form!
3. No terms and conditions in the product text (like PE). Escrow works in the same way for all vendors. If you are a new untrusted vendor, use the filter option (backpack icon) to have your offer shown only to known customers or those who ordered and confirmed the reception already a few times.

If you are in doubt about what to write where, simply do as You think, keep the product paused and send a message to the admin!

Create new product? save --- back

- pick the country you are shipping from (13)
- select the country or countries with the same shipping fees (14)
- in (15) you have to set how many pieces minimum and maximum of the listed item you ship to the chosen country and
- set the shipping fee for normal and if u like to offer tracked shipping
- after confirmation with \leftrightarrow button the chosen countries will appear in right window (16)
- the countries selected in window (16) will be deleted after pressing the \leftrightarrow button again
- in field (17) u can add an external link related to your listing
- you may select up to four pictures to show customers your item and make them wanting to buy your stuff :O)
- after browsing to the selected picture file you use the pix-SAVE button in field (18) and you are almost done with your first item listing
- to be sure press the "big" SAVE button (19) to get sure not to lose your work
- to end the procedure click on the BACK sign (20) and it will take you back to the offer list where we did start our lesson
- your new item should be listed now but the background color of the new item is red, what means its not shown for buyers

- beside the PAUSE there is the option to TEMP.PAUSE an item witch is useful because when you are of stock the costumers still get aware of the offered item and can be noticed automatically by ENOTE when the desired item is available.
- the background color of totally paused items is yellow
- use the ACTIVATE button to make users able to buy your listing
- an active listings background color is green
- you can only edit or delete an listed item when its set to PAUSE or TEMP.PAUSE
- you may add up to two additional categories fitting to your item but that's up to you

- further it is possible to set up an filter for customers where you can for example make sure that only customers with an given number of orders are able to buy
- it is possible to set up promotion codes for one special or all customers
- for setting up filter or promo codes you have to click on the BANK button in the main menu

1 € = 454 EUR
1 € = 624 USD

Promotional code

Code	Valid thru	product(s)	discount	users	Uses (Maxuses)	Action
