Part III Statement of Program Service Accomplishments

Check if Schedule O contains a response or note to any line in this Part III

1 Briefly describe the organization's mission:

OpenAI's goal is to advance digital intelligence in the way that is most likely to benefit humanity as a whole, unconstrained by a need to generate financial return. We think that artificial intelligence technology will help shape the 21st century, and we want to help the world build safe AI technology and ensure that AI's benefits are as widely and evenly distributed as possible.

2 Did the organization undertake any significant program services during the year which were not listed on the prior Form 990 or 990-EZ? Yes No

If "Yes," describe these new services on Schedule O.

3 Did the organization cease conducting, or make significant changes in how it conducts, any program services? Yes No

If "Yes," describe these changes on Schedule O.

4 Describe the organization's program service accomplishments for each of its three largest program services, as measured by expenses. Section 501(c)(3) and 501(c)(4) organizations are required to report the amount of grants and allocations to others, the total expenses, and revenue, if any, for each program service reported.

4a (Code:) (Expenses \$ **1,956,958** including grants of \$) (Revenue \$)

In 2019, the Organization created OpenAI, L.P. ("Partnership"), a new capped-profit company to help rapidly scale investments in compute and talent while including checks and balances in furtherance of the Organization's mission. Through its control of the Partnership, the Organization's reinforcement learning algorithms became the first AI to beat the world champions in an esports game. These same algorithms were then used to train a pair of neural networks to solve a Rubik's Cube with a human-like hand, requiring unprecedented dexterity. Additional research accomplishments included the discovery of emergent tool use from multi-agent interaction while playing a simple game of hide-and-seek and the creation of a deep neural network capable of generating short musical compositions with a variety of instruments and styles. The Organization also developed GPT-2, a large-scale language model trained to simply predict the next word of text and was able to generate coherent paragraphs of text. GPT-2 was released in stages to give the research community time to assess the properties of these models, discuss their societal implications, and evaluate the impacts of release after each stage. All these advances in AI technology are moving the Organization closer to achieving its mission, which is the development of Artificial General Intelligence in the public interest. The Organization also held its second edition of the OpenAI Scholars Program, which provided mentorship and support to researchers from underrepresented communities to apply their specializations to current AI research, concluding with a final open-source project.
