1 Briefly describe the organization's mission:

OpenAI's goal is to advance digital intelligence in the way that is most likely to benefit humanity, unconstrained by a need to generate financial return. OpenAI believes that artificial intelligence technology will help shape the 21st century and want to help the world build safe AI technology and ensure that AI's benefits are as widely and evenly distributed as possible.

2 Did the organization undertake any significant program services during the year which were not listed on the prior Form 990 or 990-EZ? . . . . .  Yes  No

3 Did the organization cease conducting, or make significant changes in how it conducts, any program services? . . . . .  Yes  No

If "Yes," describe these changes on Schedule O.

4 Describe the organization's program service accomplishments for each of its three largest program services, as measured by expenses. Section 501(c)(3) and 501(c)(4) organizations are required to report the amount of grants and allocations to others, the total expenses, and revenue, if any, for each program service reported.

4a (Code: ) (Expenses \$ 10,864,866 including grants of \$ 10,250,005 ) (Revenue \$ )

Through its control of OpenAI, L.P., a capped-profit company to help rapidly scale investments in compute and talent, the Organization's research accomplishments in 2020 include the introduction of: 1) GPT-3, a large language model with 175B parameters (vs 1.5B for GPT-2) that can predict the next word of text and generate coherent paragraphs of text. 2) Image GPT, a model trained on pixel sequence that can generate coherent image completions and samples. 3) Jukebox, a music neural net that generates music, including rudimentary singing, as raw audio in a variety of genres and artist styles. 4) Microscope, a collection of visualizations of every significant layer and neuron of several model organisms in order to help the research community better understand complicated systems. In order to explore the strengths and limits of its technologies in the real world, the Organization also developed an Application Programming Interface (or API), giving developers the ability to build GPT-3s capabilities into their apps. The OpenAI API was made available in private beta to select, approved developers who must abide by the use case guidelines, terms and policies established by the Organization consistent with the mission. The Organization reviews every app before it goes live according to its use case guidelines. All these advances in AI technology are moving the Organization towards achieving its mission, which is the development of Artificial General Intelligence that benefits humanity. The Organization has continued to support the OpenAI Scholars Program, which provides mentorship and support to researchers from underrepresented communities to apply their specializations to current AI research, concluding with a final open-source project.
